**COUNTING STARS: WHO'S WORK IN  
SPACE SCIENCE COUNTS ACCORDING  
TO SCIENCE COMMUNICATION**

**22 Nov. 2022 · 3:30 pm ET · *Bell Room (Rutherford 103)***

Nothing would happen on space sciences without the labor that gets the work done. But not all work gets equally celebrated in public. In this talk I trace how we can develop critical insights into the labor required for space sciences, and how we talk about these ideas in science communication. Through the talk I highlight how this can develop our theorising, research agendas, and approaches to scholarship.
